

**Why Customers Love The  
DRY-WETCLEANING™ Solution**

- DWX-44™ is safe, clean and provides superior results.
- Faster delivery because processing time is decreased.
- Leaves no harmful residue on garments.
- No color loss or fade. Colors stay bright, fabrics stay soft with good hand, manufacturers finishes remain intact.
- No shrinkage.
- Static-free, minimal lint, and no solvent or bad bacterial odors.
- Gentle with all fabrics, including delicates.
- Doesn't allow spots and wrinkles to "set" into garments.
- Reduces stress on most fabrics. **anti-odor and deodorizing**
- Allows garments to retain their natural moisture.
- No special handling for most beads, sequins, buttons, trimmings, and difficult garments.

# DWX-44™

## DRY-WETCLEANING™ Solution Facts

Composition: • Aqua-based solvent, with full anti-odor and deodorizing properties.

Properties: • Clear, odorless liquid.  
• Flash Point - None  
• Fire Point - None  
• Boiling Point - 214°F

Safety: • Non-toxic.  
• Non-irritating to skin.  
• Non-sensitizing.  
• No immunosuppressant effects.

## DRY-WETCLEANING™ SOLUTION XTRA STRENGTH

The New Ecological Solution  
For The Dry Cleaning Industry

## **A Technological, Ecological Breakthrough For Dry Cleaners!**

Every so often an innovation comes along that revolutionizes an industry. Say hello to **DRY-WETCLEANING™**, a process that not only cleans and freshens garments, it also eliminates the health, environmental, customer, landlord and government problems associated with traditional "Perc" dry cleaning...and the zoning, flammability, odor and cost issues that trouble processes using Hydrocarbon, Silicone, Glycol Ether solvents, and Liquid CO<sub>2</sub>.

**DRY-WETCLEANING™** evolved from technology used in the Silicon Valley to clean computer components. That initial process and our years spent developing a more cost-efficient, environmentally and occupationally safe cleaning process led to results very similar to those produced with Fluorocarbon Dry Cleaning:

- **DWX-44™** our aqua-based, ecologically correct, non-toxic, anti-odor **DRY-WETCLEANING™** solution that cleans and freshens most garments brought into professional dry cleaning or wet-wetcleaning stores.
- The state-of-the-art, easy to operate "Green Jet"™ Dry-Wetcleaning Machine (patent pending) which cleans garments by using **DWX-44™** in a unique jet spray and air pulsating system to dislodge dirt and soil, filter it out and absorb it, and then tumble dry garments nearly wrinkle-free in a single stainless steel machine.

**DWX-44™** solution is formulated from a proprietary blend of anti-odor, non-toxic chemicals and supplies used in wet-wetcleaning. The solution can be used to pre-spot garments, however for Dry-Wetcleaning™, the solution should only be used in the "Green Jet" machine (patent pending). **DWX-44™** enviro-safe spotting agents are also available.

## **Why Nature Loves The DRY-WETCLEANING™ SOLUTION**

- Ecologically correct, environmentally and occupationally friendly. No contamination of site or nearby occupancies.
- Totally non-toxic (oral, dermal, inhalation). Does not require labeling by OSHA.
- Non-flammable.
- Non-VOC; no statutory exposure guide lines to monitor.
- RCRA and CERCLA non-regulated.
- Contains no hazardous air pollutants.
- Chemically inert. No chemical reactions with surface contaminants.

## **Why Employees Love The DRY-WETCLEANING™ SOLUTION**

- Cleans all colors and fabrics in the same load, without color loss or fade.
- Cleans a broader range of garments with minimal load classification.
- Garments do not have to be transferred from a washing to a drying machine.
- Start-to-finish cleaning process takes about 30 minutes (about half the normal cycle time of dry cleaning).
- Almost impossible to ruin a garment.
- No complex equipment or stills to clean and maintain. No bad odors.
- No toxic or flammable vapors in work areas.
- Minimal to no wrinkling. Finishings a breeze.

## **Why Your Bottom Line Loves The DRY-WETCLEANING™ SOLUTION**

- Increased customer loyalty and repeat visits because garments are returned cleaner, fresher and faster.
- Few if any claims for damaged or misassembled orders.
- No need for expensive additives, total costs are over 50% less than other processes.
- Process uses far less energy consumption, no refrigeration or steam consumption.
- **DWX-44™** solution may qualify for special funding or tax breaks in some states.
- Pressing time reduced, and training on the "Green Jet" machine is quick and easy.
- No strict zoning regulations, special environmental permits, taxes, or high cost pollution or fire insurance associated with other processes.
- Complete order processing with less misassembly claims.
- No disposal costs.
- Leasing help, your landlord will love it.
